About MMI

PT Marata Mars Indotama (MMI) is a local Indonesian corporate group, which is slowly and steadily developing into a business group with international standards which operates in the fields of trading and special production of metal and steel engineering, construction, agribusiness, general trading and management consulting. Since starting its business until now, **MMI** has always prioritized the principle of professionalism for partner success, with the motto "***We stand beside your business***".

MMI Group classifies itself as a leading group that significantly contributes to the development of the Indonesian economy which focuses on development, construction, supply, energy and management. We believe that achieving its mission to become a market leader is always based on discipline and professionalism in all aspects, both in its core business and always optimizing resources (financial and human) to achieve prosperity for shareholders and employees as well as its contribution to the growth of the Indonesian economy.

MMI Group chose Jakarta as its activity base and head office but already has a network of representative offices in several large cities in Indonesia such as Semarang, Surabaya and Pekanbaru.

SHUTTER DOOR

Industrial Shutter Door. Electric and Manual

Industrial Shutter Door

The Industrial Roller Shutters are the most popular shutters for industrial and manufacturer building. It's one of the most versatile and cost effective types of roller shutter and goes up to 9 m wide and 9 m high.

The 100mm curved steel laths, are available in 22G (0.7mm), 20G (0.9mm) and 18G (1.2mm), depending on the size of the roller shutter and the security level required. The industrial steel roller shutter is also available with a Wicket Door, for pedestrian access without having to fully open the

The door leaf material is made of galvanil with a powder coating finish. The leaf shape/leaf cross-section is specially designed so that it can be used for stretches up to a maximum of 9 meters

Using the high quality moto rolling door with a brand Kinzoku made in Taiwan.

There are also other brands available, made in Japan according to client request

The guide rail is processed using a forming machine, so it can be used to a height of more than 6 meters without joints and with precision

The manual tackle is adjusted to the door being used so that operation will be lighter

The Safe & Secure.

MARS

Providing services for making folding gate doors, rolling doors, steel doors and factory-produced oven paint at low prices and high quality

PT. Marata Mars Indotama, apart from producing various types of Steel Door doors, is also a company that specializes in manufacturing and installation services for doors such as Folding Gates, Shutter Doors/Rolling Doors, and Door Services. The products we offer are the result of work from our own factory. Therefore, we have our own quality that prioritizes quality and high standards.

We also provide affordable prices but still provide guaranteed good quality and guarantee. We always provide the best service for the satisfaction of our customers. So you don't need to hesitate to choose us as a quality Folding Gate, Shutter Door/Rolling Door and Door Service for your needs..

Rolling Door One Sheet

ONE SHEET rolling door is a rolling door made of steel. Processed with a roll forming machine. By using the latest technology, a perforation process (2.5 mm holes), the room will remain fresh because air circulation can continue even though the room is closed

The Safe & Secure.

Nylon felt is made from rubber woven with nylon, so it can reduce the sound produced during operation

The key cover and handle are made of iron so they are not easily damaged/ broken. Lock the bottom using an iron plate, not a chain

The pulley with a diameter of 24 cm is designed using nylon.

Equipped with a rubber bottom which can reduce the entry of water and light. Made with the best materials to last a long time

AUTOMATIC RETRACTABLE GATE

Industrial Automatic Retractable Gate

- Product model: QG-DZ2103 (yellow)
- Dimensions (mm):
340×260×1000(L×W×H)
- Working voltage: AC220V±10%
- Motor input voltage: AC220V
- Motor power: 90W
- Shell protection grade: IPX4
- Standard colors: yellow, gray
- Pole length: 3-5 meters optional
- Start time: 6S
- Remote control distance: 35M
-

- Compatible with IC/ID, magnetic card, barcode card, anti-static and other control equipment;
- The brake lever runs smoothly, with low noise, and the unlocking is fast and reliable;
- It has the emergency function of power failure, and the gate is automatically opened after power failure;
- Protection grade: IPX4;
- Infrared anti-pinch;
- Door opening and closing delay;
- Illegal break-in to the police;
- Anti-reverse intrusion.

- Working principle: 370W motor
- Size: length: 6000mm * width: 550mm
height: 75mm, interception height:
00mm. (Length can be customized)
- Material: steel, plate thickness 16mm.4.
Thickness of tire breaking blade: 8mm
- Lifting height of tire breaking knife:
130mm
- Bearing weight: 100 tons
- Lifting control: short-range wireless
remote
- control/wired control, control distance
